Project title: Nazca Lines

https://en.wikipedia.org/wiki/Nazca_Lines

This website would be a single-paged, vertically long website with an image viewer. Because the Nazca lines are all close to each other and share similar origin, I can have a “common” explanation/purpose section and an image viewer section to display images of the Nazca lines. Wikipedia page contains a lot of images (12) and enough content to build this website.

Introduction

- What Nazca line is, where they are located

Image viewer

- slide-show style image

Purpose

- Theories on why these lines were built
- (Alternative) Explanations

Preservation efforts and damages

- recent cases of damages on the lines
- efforts to prevent such threats
